

Marine Data Alert

Jeppesen CHART CHANGE NOTICES contain significant information affecting Jeppesen Charts. They are regularly updated at the Jeppesen web site. Go to www.jeppesen.com and then click on the Marine Alerts link.

Date: October 20, 2008
Subject: Missing Features on Jeppesen Marine Charts
Affected Products: Passport World Folio 39

It has been identified that certain Passport World Folio 39 chart features, including but not limited to some bridges, floating docks, bottom characteristics, land areas, drying heights, offshore platforms, precautionary areas, depth values, obstructions, and gates, which are important for navigation are not displayed when used with the Nobeltec navigation software packages or Original Equipment Manufacturer (OEM) Marine Plotter solutions listed below:

- Nobeltec Admiral 7.x through 9.3
- Nobeltec VNS 7.x through 9.3
- Nobeltec eChart Mariner 7.x
- Nobeltec eChart Planner
- Northstar 972
- Simrad GB60 v. 1.0 or v1.5

Missing information may represent a hazard if navigators are misusing affected products by relying solely on them for primary navigation, instead of placing primary reliance on up to-date official government charts and Notices to Mariners

This omission will be corrected in the upcoming new edition of Passport World Folio 40 chart library.

JEPPESEN URGES AFFECTED PASSPORT WORLD FOLIO 39 CUSTOMERS TO UPDATE THEIR CHART LIBRARY TO WORLD FOLIO 40 AS SOON AS IT IS AVAILABLE.

Updating your Passport World Folio 39 chart library to World Folio 40 will be complimentary. When World Folio 40 is completed and ready for distribution, Jeppesen

Marine Data Alerts are published to inform users of significant issues in Jeppesen navigation data which may affect marine operations or safety. They are distributed to affected Jeppesen users (shipping companies, OEMs, and other data users) and to registered marine customers receiving data products directly from Jeppesen. Alerts are not distributed by Jeppesen to individual non-registered mariners, but are available to them on the Jeppesen Web site, www.jeppesen.com/marinealerts/. Different plotters and computer systems use and display Jeppesen data differently. Users should consult with their database update service provider for definitive information on whether their system is affected by this Alert.

Marine Data Alert

will send out another communication on the process for receiving the updated World Folio charts.

Additional Information

Jeppesen Marine reminds navigators that nautical chart information is constantly changing.

National Hydrographic Authorities periodically publish new and updated information. As it is received, Jeppesen Marine incorporates the updated information into new and existing products. These changes are available to our customers for purchase.

Therefore, navigators should check their Jeppesen Marine charting products to make sure that they have the most current version available. If your charts are outdated, Jeppesen Marine urges you to update them via authorized dealers and resellers, or directly through Jeppesen Marine.

Jeppesen electronic charts are an aid to navigation designed to supplement the use of authorized government charts, not to replace them.

Marine Data Alerts are published to inform users of significant issues in Jeppesen navigation data which may affect marine operations or safety.
